New Royalty Company Being Formed to Control Leases in Irma-Wainwright Oil Fields

Many Novel Features For Those Interested in Securing Leases.

In this week's issue we are announcing the formation of a New Royalty Company, in which every owner of a lease will have an interest in all oil produced from several thousand acres. The promoters of the new company have quietly secured leases on some 2500 acres including many of the best locations in the Irma-Wainwright district. Negotiations are now under way with prospective drillers and endeavours will be made to have several drills working on the holdings of the new company before the close of the present season. The company will only be capitalized for forty thousand shares, par value one dollar. No shares will be offered to the public but parties furnishing the money to file on the leases will receive one share for each acre of lease furnished by them. Subscribers securing leases will secure an agreement entitling them to 8 per cent royalty of all oil or gas produced from the leases secured for them, as well as one share of stock in the company for each acre of leases secured.

One share per acre will be issued to pay for the organization of the company, securing leases, advertising, procuring development, legal and other expenses. As soon as all the acreage the company desires to secure has been obtained a general meeting will be called. At this meeting the permanent officers of the new company will be elected and all the leases the company have secured will be allotted to the respective subscribers. All leases will be held in the name of the new company and deposited with a reputable Trust Company in Edmonton for safekeeping. Royalty agreements will be prepared for each forty acre tract held by the company. Duplicate tickets will be prepared. One ticket with the name and address of each applicant for a lease will be placed in one container and a ticket representing each royalty agreement, with the legal description of same will be placed in another container. At the general meeting, arrangements

will be made to have some disinterested party or committee draw the cards from the respective containers recording the location drawn with each name. In this way there can be absolutely no chance of favoritism shown in the allotment of leases and parties having more than one application for leases will stand a better chance of having their royalties scattered over the group. As only 8 per cent of the royalty from each lease goes to the original owner of the agreement, the balance of all royalty or profit received by the company will be divided among all the shareholders, thus giving each member of the company an interest in every lease in the group. As it is the intention of completing the organization of this company within the next two weeks, those interested in securing a ground floor interest in this our greatest natural resource, should avail themselves of this chance by using the application on the back page of this issue.

Wainwright Oil Development Company Complete Contract With New Syndicate to Develop Holdings

The Good News Gladdens Hearts of the Shareholders.

Wednesday the members of the Wainwright Oil Producers Syndicate met the directors of the Wainwright Oil Development Co., and completed the contract that had been pending whereby the new syndicate will start immediate operations on the leases of the local company. Among the business men of Edmonton who are interested in the new syndicate and who attended the meeting at Wainwright are the following: J. B. Gillis, A. C. Fugue, Jas. Shaw, T. Ketley, T. H. Bergstrom and N. J. MacDonald. Mr. J. B. Gillis was appointed Secretary

of the syndicate and C. A. Walton, of Wainwright, field manager, with R. Bradley head driller. We understand that L. L. House of Wainwright has been instrumental in forming the complete standard rig which is now being unloaded at Wainwright. During their visit at Wainwright Wednesday, the members of the new syndicate visited some of the leases near Wainwright and selected the site for their first well. This well will be on L. S. 9 of Section 36, Township 44, Range 7, a short distance south of the location

formerly selected by the old company. Mr. R. Bradley started with a gang of men yesterday morning unloading the four cars of machinery, casing and timbers which arrived some days ago. We understand that the timber for the derrick and camp buildings is being secured from a local yard and a gang of men will be started on the derrick within the next few days. The completion of this contract will be good news to the shareholders of the Wainwright Oil Development company.

C.S.E.T. Athletic Tournament and School Sports Day, Tuesday, June 3

The annual Provincial C. S. E. T. Athletic Tournament which was won by the Irma Trail Rangers two years ago will be held on June 3rd. The teams competing at Irma will include the boys from Chauvin, Edgerton, Wainwright, Irma and probably Viking.

All the boys must be in good standing as Trail Rangers or Tuxis Boys and will be classified according to age and weight. The events include the running high jump, running broad jump, potato race, sprints, throwing the baseball and putting the shot. The Irma boys have been practicing faithfully for some time and are out to duplicate the record they established two years ago.

In order that the day may be worth while for all the boys and girls in the district Mr. Horn is arranging to

have sports for all the school children. There will be races of all kinds for every boy and girl so all the parents are asked to come out on the third of June and make this a real sports day for the children. Arrangements are being made to run the school events at the same time as the C. S. E. T. Tournament is being held so that there may be something doing all the time for everybody.

The admission will be 25c for adults, children free. Prizes will be given for all the events which will start as soon as possible after dinner. Don't stay at home on the 3rd of June but come out and make this a big day for the children of Irma. In the evening a Tuxis Conclave is being held for the visiting Tuxis boys from other towns.

ANNOUNCE THIRD ANNUAL TOUR TO THE COAST

Special Train From Winnipeg. Stops Made At Various Points of Interest

Personally Conducted

This tour, which will be interesting to the holiday maker and of great educational value to the student and to the teacher, offers an unusual opportunity for seeing, under the most favorable conditions, the Canadian Rockies, including Jasper National Park and the Pacific Coast.

The special train, operated in connection with this tour and consisting of modern sleeping car equipment, dining car and radio observation car, will leave Winnipeg, July 2nd. After stopping at various points of interest, the train will arrive at Prince Rupert on July 7th. At this latter point, the party will embark on one of the palatial steamships of the Canadian National Pacific Coast services for a cruise of 550 miles through the famous "Inside Passage" to Vancouver. While the tour terminates at Vancouver, those who desire to make a trip to Victoria, may have their tickets read "Victoria" as their destination without any additional cost.

The local agent of the Canadian National Railways will be pleased to give you full particulars of this tour, including the cost, choice of routes returning, etc.

NOTICE

Notice is hereby given that a list of lands against which proceedings have been begun under the Tax Recovery Act, 1922, appear in The Alberta Gazette, published on the 15th day of May, 1924, and unless the amount of arrears of taxes and costs are paid on or before the 15th day of December, 1924, a certificate of title will issue to the Municipality in respect thereof.

A copy of said list may be seen in the office of the treasurer during office hours.

Dated at Irma this 26th day of May 1924.

R. J. TATE,

Treasurer.

INTERESTING GOSSIP ONLY

Every once in a while we are accused of missing some piece of news, because it did not appear in The Times. We know about it, but we passed it up. Usually the news is something which, by its publication, could do no good, and only would embarrass someone—and is interesting only as gossip. Don't criticize the editor if he doesn't print all the news. Some day you may be tremendously glad he didn't.

The Irma Chautauqua dates are June 25th, 26th, 27th and 28th.

Note the Globe Drilling Company's advertisement on the centre pages.

Two Million Dollar Rain Brings Smiles

While Sunday's rain and snow were not ideal conditions for holiday making, farmers throughout the province are rejoicing to day, for the downfall means assurance of ample moisture for seed germination with a good reserve for growth of the young plants until the June rains can be counted upon to supply the summer supply of rain.

There were several heavy showers before daylight on Sunday morning, and when dawn broke rain and snow, driven by a strong north wind, were falling heavily. The precipitation as given by the weather station shows 1.06 inches of moisture, which is somewhat of a record for this time of the year.

Nowhere did the snow stay on the ground for long after falling. The rain was general over the whole of northern Alberta and will be appreciated to the full by farmers.

Similar good news comes from the drought area of southern Alberta, where, up to the week-end, seeding was at a standstill owing to extreme dryness of the land and the doubt in the minds of the farmers as to when there would be rain. Advice from Calgary state that the rainfall was general in southern, eastern and central Alberta over Saturday and Sunday, the south country receiving a large share of the needed moisture.

IN OTHER TOWNS.

(Strathmore Standard)

The liquor vendor's store at Red Deer is to be situated next to the office of one of the local newspapers. No special significance can be attached to this for incredible as it might seem, the Red Deer editors are both teetotalers. In fact they are sometimes referred to as the exceptions which prove the rule.

(Alliance Times)

The booze artists around Alliance are well away to a good start with the first consignment from the government vendor arriving Tuesday evening, and this supply had not yet been exhausted on Thursday morning. The midnight and early morning drinker birds were out disturbing the peace.

(Canadian Finance, Winnipeg)

Fundamentally, the law of strife is the law of worthy life. Only through labor and painful effort, by grim energy and resolute courage, can we move on to better things.

(Strome Despatch)

J. B. Leggett, who has been buying draft horses in the district for several days, secured 19 and shipped them to Ontario, leaving here on Tuesday morning. He had a good bunch, and the price paid averaged less than \$100 per head. He was a good judge of the weight of horses as one of our well known farmers will agree, as it cost him \$25 to find out.

Main Street

Mr. H. Long has been spending a few days in Edmonton.

There will be no dance held on June 3rd at Irma.

Kenneth Matheson has been confined to the house with a threatened attack of pneumonia.

We are sorry to report that Mr. W. B. Steele is still in a very critical condition.

Mrs. C. T. Hill we are glad to report is doing nicely after her attack of pneumonia and expects to be able to be out in a few days.

Don't forget that the Stores and business places in Irma will close Wednesday afternoon during June, July and August.

Rev. G. Elliott left Monday morning to attend the conference at Calgary. Mr. Rice teacher at Education Point School will have charge of the service at Irma next Sunday night.

Mr. A. Hughes and W. Matheson returned to Irma last Saturday night after making a trip to Victoria, B. C. in quest of a summer's work. They both report conditions better in the local district than in any parts they visited.

All football fans are requested to join with the players at the Silver Lane School next Wednesday night at 7 p. m. for practice. The boys in this district have organized a good team and are desirous of meeting any fans who wish to help them in their practice.

The extra gang consisting of some 150 men who have been laying the new steel rails from Wainwright west have completed their task as far as Jarow. While the gang was at Irma the stores and pool room did a lively business in the evening in supplying the men with the necessities they needed.

Mr. L. B. King and George Maddier and their wives intend leaving next Tuesday on a motor trip to Florida, stopping to visit relatives in Ontario and other intervening parts. Mr. Maddier has rented his farm for a year and if conditions appeal to them in the south country they may stay there till next spring.

Dr. G. C. Creelman, formerly head of the O. A. C. Guelph, Ont., J. Gallagher and L. C. Douglas of the S. S. B. were guests at the Irma hotel Wednesday night, leaving Thursday for Manitoba. All of these gentlemen are very optimistic as to the future prospects of the new oil fields.

M. D. BUFFALO COULLEE No. 453 Applications will be received by the Council for the position of Assessor up to noon of the 31st day of May, 1924 according to the Supplementary Revenue Act and the Municipal Districts Act for making an assessment of the whole District for 1924. The Assessment to be completed by the 1st of September, 1924. Remuneration for same \$275.00.

Applications to be marked and delivered to

ARTHUR CURTIS, Sec. Treas. Saulteaux P. O., Alta.

CARD OF THANKS

I wish to thank my friends and neighbors for their kind assistance and sympathy during the sickness and death of our father and husband.

Mrs. D. Ambler & family.

Heavy Rains Retard Operations at New Oil Wells

The heavy rain of last Sunday was a blessing to the farmers in the Irma-Wainwright district but has caused a lot of grief among the men who have been trying to move heavy machinery and equipment to the different oil camps and will cause several days delay in spudding on some of the new wells. Probably the worst conditions have been met at the new location of the Maple Leaf Company on Section 24-45-8 west of Fabyan. The road to this location goes over nearly a mile of river bottom land all of which has been plowed and was in good condition to hold all the rain which fell in it as well as a lot that ran off the sides of Battle River banks. No attempt was made to move any of the heavy machinery until Wednesday when N. King succeeded in getting the boiler within half a mile of the new location, eighteen horses were used in moving it from the former location at the B. P. well No. 2. Men have been busy making a new road around the plowed land and if no more rain comes for the next few days the rest of the

machinery should all be landed by the time that D. O. Credille the head driller arrives. Mr. Credille sent a wire to Edmonton the first of the week that he would be leaving Texas by Tuesday for Fabyan so that he should be here within a week. At the B. P. camp work has been progressing very nicely considering the weather conditions. No. 3 well should be ready to spud in the first of next week. The derrick is completed at No. 4 and most of the machinery is on the location.

The Western Consolidated Oil Company are awaiting the erection of their derrick on Section 29-45-8, we understand all their equipment has been shipped and work will be rushed on this well as three carloads of machinery arrived Thursday.

The Mutual Oil company, Anglo-Wainwright Oil company and Canadian Sunburst Oil company, all of Vancouver are reported to have shipped timbers and equipment from the coast but to date we have been unable to ascertain when this will arrive or where it will be located.

New Company Enters Promising Field This Month

In this issue we note a new arrival in the Wainwright-Irma oil field. This is the Globe Drilling Company, a group of Edmonton capitalists with a wide experience in the Province, extending over the last twenty-five years. The Globe is a drilling company as well as a development organization and own two drilling outfits at the present time, and will acquire additional machinery and oil field equipment as the plans and undertakings of the Company progress.

The Company controls valuable acreage in the central section of the field near the B. P. and Fabyan producers. It has also several thousand acres in the Pigeon Lake area and has already a well sunk there to the depth of 1,200 feet.

The field men of the Company have made a close study of the requirements of Canadian oil development. They are in close touch with the best geologists of the country and are working along approved lines. From a

very attractive and interesting pamphlet issued by the Company a few days ago, we quote the following paragraph, which will, we are confident, inspire a lot of optimism in the minds of the people of Alberta:

"From the accompanying Geological map it will be seen that the geological structures so prolific in oil in the United States, extend into Alberta. Many productive oil fields in Oklahoma, Colorado and Wyoming have been developed. The recent discovery of oil in commercial quantities in Montana and the northward continuation of the same oil formations into Alberta has stimulated drilling and exploration in Central Alberta and has proven beyond doubt that the structures are suitable for the accumulations of petroleum reservoirs."

The Company's office is located, for the time being, in the office of the Western Realty Co., 10004-101a Ave, Edmonton.

On account of Tuesday being the King's Birthday, the council of the Municipality of Battle River will meet on Monday instead of Tuesday which is their regular meeting day.

RED ROSE TEA "is good tea"

and the choicest of Red Rose Teas is the
ORANGE PEKOE QUALITY

On To The Bay!

In the widespread—almost universal—demand in Canada for reduced expenditures and reduction in taxation, and which it is pleasing to note is making itself felt at Ottawa, in the several Provincial capitals, and in practically all municipal centres, there is some degree of danger that people will unthinkingly condemn all expenditures on new projects without taking the trouble to ascertain whether expenditures in certain directions may not be true economy.

There is also the danger that interested parties will endeavor to capitalize the popular demand in order to defeat projects which, because of self-interest, they oppose.

If the roof of a \$5,000 building calls for repairs, and heavy loss will result unless needed repairs are made, it will be the height of folly to refuse the necessary expenditure for such repairs. If the economical handling of the output of a factory was prevented because of lack of a railway siding, it would be foolish to save the cost of such siding at the expense of the proper management and development of the industry. Yet signs are not lacking that in the demand for reduction in expenditures, just such selfishness will be followed in the management of public business.

The completion of the Hudson Bay Railway is a case in point. Canada has spent some tens of millions on this railway. A hundred or more miles of track has been laid, and more miles of roadbed graded. Large sums have been spent on terminal facilities. Every cent of this money is absolutely wasted, thrown away, unless further expenditures are made to complete the undertaking. Yet the writer of a series of articles in a Toronto publication on extravagance at Ottawa and the "pork barrel" angles on the Hudson Bay Railway for attack and denounces the spending of another dollar on it. He charges that it is a purely political undertaking, a huge scheme at public expense to buy votes in the West.

The real remains that the Hudson Bay Railway is approved not by one party seeking votes, but by all three political parties in Canada. It is demanded by all the Provincial Legislatures in the Western Prairie Provinces, by all representative public bodies in the West, and by the people generally. It is there is one thing required in the West today it is a restoration of confidence, and an announcement of the immediate completion of the road to the Bay would do more than any other one thing to restore confidence.

Eastern cities, particularly in Montreal and Toronto, scoff at the feasibility of the Hudson Bay route. Their opposition is, clearly, based rather on fear of its feasibility and success and consequent loss of Western grain traffic passing through or paying toll to these cities. Admittedly the Hudson Bay route can be used only a portion of the year. But this is illogical. True of the ports of Montreal, Quebec and Toronto. Yet Canada has spent hundreds of millions on these ports in order that they may be used for certain months each year, and the money has been well spent. But if the cities of a by-gone day had had their way, these inland ports would not have been developed and Canada would have depended on the all-the-year-round exports of the Maritime Provinces.

People scoffed at Christopher Columbus. Canada itself was described as so many acres of ice and snow not worth the knowing. At the moment of the writer a Toronto syndicate declined a franchise for an electric street railway in Ottawa because it could not be successfully operated on account of the heavy snowfall. Pages might be filled with similar evidence of scoffers and critics of by-gone days.

Canada is committed to the Hudson Bay Railway. It will be completed some day. Then why not now and begin to reap the benefits of its construction and operation? Critics and opponents say this is not the time because Canada must reduce expenditures and economies. But Canada's financial position will demand economy and careful scrutiny of expenditures not merely in 1924 but for the next twenty-five or fifty years until our war debt is paid off. It is sincerely to be hoped that the present public demand for retrenchment and reduction in taxation is not "a flash in the pan," spasmodically made and quickly forgotten. If that is all it is, then it will be worse than useless for the tendency will be to follow it with a new orgy of extravagance.

Every year that passes without the completion of the Hudson Bay Railway means economic loss to Western Canada and its people. It means retarding the development and prosperity of this section of the Dominion which will reflect adversely on all Canada. Every year means greater deterioration in the work already done on the road, consequently additional expenditure ultimately.

On all counts, therefore, now is the time to proceed with the completion of the railway as rapidly as possible. Its ultimate completion cannot be prevented; it can only be delayed. Inasmuch as delay means all round loss, then in the name of reason, why delay? Rather, let us go "on to the Bay," with all possible speed.

Butter Shipments to United States

Saskatchewan Product is Shipped by the Carload to Points South of the Line

For the first time in the past two or three years the Saskatchewan Co-operative Creameries, Limited, is shipping butter in carload lots direct to cities in the United States. A carload shipment was recently made from Saskatchewan to Philadelphia. Two carloads were also shipped to Chicago, where they realized good prices. Each car contained between 25,000 and 30,000 lbs. of Saskatchewan butter.

It is easy to get anything you want—if it happens to be something that nobody else will have.

England Wants African Cotton

British Government Will Foster Production in Kenya

The intention of the government to foster cotton production in Kenya, Africa, has been indicated by Colonial Secretary J. H. Thomas in the House of Commons. All the evidence, he said, showed that cotton could be grown in Kenya far more extensively than it had been, and it is the kind of cotton that is particularly suitable to the Lancashire trade. "If we can grow cotton within the Empire," he said, "it is our obvious duty to do so."

Some love affairs end at the altar—but the majority never get that far.

"Worth \$100 to Me Relieved Eczema and Piles"

Mrs. Peter A. Palmer, Saltburn, Sask., writes: "Dr. Chase's Ointment has completely relieved me of eczema and piles. I also used this Ointment for my baby, who broke out in eczema. A few applications were all that was necessary in her case. Dr. Chase's Ointment has been worth a hundred dollars to me, before using it. I had spent a great deal more than that in unsuccessful treatment from doctors. We have also used Dr. Chase's other medicines, the Nerve Food having restored my health after suffering from severe nerve trouble when a girl."

Dr. Chase's Ointment

60 cts. a box, all dealers or Edmondson, Bates & Co., Ltd., Toronto

Secure Scientific Data

Smithsonian Institution Describes Exploration and Field Work

The Smithsonian Institution at Washington has just issued an illustrated pamphlet describing the exploration and field work conducted by members of its staff or in co-operation with other organizations during 1923. Besides many localities in the United States, the regions visited include the Canadian Rockies; the Long-Tee Valley, China; several islands of the West Indies; Panama and Central America; Labrador and various countries in Europe. The branches of science represented include geology, paleontology, anthropology, zoology, botany, and ethnology. Secretary Charles D. Walcott continued his geological research in the Canadian Rocky mountains, working especially on the pre-Devonian strata from the Clearwater River southeast to the Bow Valley and along the eastern side of the Columbia River Valley. The latter region was found to be excellent for geological studies, as the many canyons and ridges give access to several of the formations from top to bottom. Beneath the great series of limestones, shales and sandstones there are 16,000 feet of older stratified rocks.

As a veritable effective preparation is Mother Graves' Worm Expeller, and it can be given to the most delicate child without fear of injury to the constitution.

China For Empire Exhibition

Two Million Pieces Will Be Required For Restaurants

Although the public is being educated daily in the gigantic proportions of the Empire Exhibition, it is somewhat astonishing to learn that two million pieces of china will be required to maintain the service in the twenty-five restaurants and cafes there. Of this 98 per cent. is to be made in the potteries by English firms, and 2 per cent. represents the special decorative ware which will be ordered from the continent for the most exclusive of the restaurants, to which the name "L'oriental" has been given. An order for 2,000,000 pieces of table silver has already been placed with a Birmingham firm, and in all 15,000 spoons, forks and knives will be required there. Orders for table linen will embrace 750,000 pieces, and 750,000 glasses, 15,000 chairs and 7,500 tables will be required. The largest kitchen at the exhibition will be admirably equipped and will be a third of an acre in extent.

SATISFIED MOTHERS

No other medicine gives as great satisfaction to mothers as does Baby's Own Tablets. These Tablets are equally good for the newborn babe or the growing child and are absolutely safe. They cannot possibly do harm—always good. The Tablets are mild but thorough laxative which regulate the bowels and loosen the stomach and thus relieve baby of any of the minor ills of childhood such as constipation, indigestion, colic, etc. Concentrated from the finest of the Filling, St. Sylvester, Que. writes: "Baby's Own Tablets have been wonderful benefit to my baby who has been suffering from constipation and indigestion. I always keep the Tablets on hand and would advise all mothers to do likewise." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wgman Is Candidate

Mrs. H. McGregor, of Penitence, B.C., well-known in various women's organizations, has been chosen as the Liberal candidate for the provincial legislature from Similkameen riding. The nomination was made at a convention at Keremeos.

Two Important Food Factors

Clark's Beans with Pork possess two important food factors. While being a most wholesome food they are delicious and appetizing. No trouble—simply heat and serve. "Let the Clark Kitchens help you."

Japs Disturbed

Over "Yellow Snow"

Dust From Gobi Desert Is Explanation of Scientists

A fall of "yellow snow" is reported from Nippon, on the northwestern coast of Japan. The inhabitants of the region are much disturbed, considering the phenomenon an omen of evil import, but scientists have an explanation.

They believe that clouds of the yellow dust from the Gobi desert, which frequently are driven over North China and are especially well known in Peking, have been carried across the Sea of Japan in snow clouds.

Old inhabitants of the Nigata district recall that half a century ago there was a fall of "red snow" in that region.

It takes a bachelor to give you pointers on the fair sex. A married man never has a word to say on the subject.

Minard's Liniment for Corns

Sugar Once Used As Drug

Sold in Great Britain For Forty-Three Cents a Pound

"As you pour a little sugar in your tea or coffee, did you ever stop to think that one time it was used as a drug and it cost forty-three cents a pound?"

This was one of the main topics in a lecture given to the Technical School of the Edmonton Technical School, by A. F. Lehmann, professor of chemistry at the University of Alberta, when he spoke on sugar. Professor Lehmann told of the first use for sugar being in India and Siam, and how it was later taken to Great Britain where it was at first used as a drug. Why it was used this way and the quantity consumed at each dose is not known, he said. A large cargo in those days consisted of fifty tons sold at forty-three cents a pound.

The speaker described the sugar as being stored in the stem of the plant, which was similar to the Indian corn. The plant has no need for sugar and with slips from the cane. It is harvested yearly and Dr. Lehmann said the sugar from the beet, the maple tree and the cane were just the same, the only difference being in the purity. He mentioned that the impurities in the maple sugar were pleasing to the taste, but those in the beet and the cane were nasty. The great points had to be taken in the refining of these sugars, especially in the case of the beet.

Colds Stopped In Ten Minutes

There is a new remedy that is very pleasant—it fills the chest with a healing balm from the pine woods, and utilizes that magical mixture of the Blue Gum Tree of Australia. The remedy is "CATARRHOZONE". It is equal for colds, coughs, or catarrh.

Composed of medicinal pine essence, a remedy of nature, that's what CATARRHOZONE is, and you'll find it mighty quick to act and certain to stop your cold. Don't dope your stomach with rough mixtures—use CATARRHOZONE, which is safe and certain. It will act quickly. Two months' treatment guaranteed, costs \$1.00; small (trial) size 50c. Sold by druggists everywhere. Buy from The Catarrhozone Co., Montreal.

Extension of Telegraph Lines

To Spend Half Million in Telegraph Lines in B.C.

An investment of \$500,000 in British Columbia on new telegraphic lines centring at Vancouver, is to be undertaken by the Canadian Pacific Railway's telegraphs. It is announced by W. Marshall, assistant manager of western telegraph lines.

Two new lines will connect Vancouver with Sunnis and Calgary, increasing the service to compensate for the growth of business in this port.

One effect will be direct connection with Portland, as the Sunnis line will join with the postal wire at that point.

The Oil of Power.—It is not claimed for Dr. Thomas' Edecolite Oil that it will remedy every ill but its uses are so various that it may be looked upon as a general "pick-me-up." It has achieved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

RED DIMPLES ALL OVER FACE

Itched and Burned. Face a Slight. Cuticura Heals.

"My face came out all over in little red pimples and then it would scratch. I would rub and scratch it and little eruptions would come. They itched and burned and at night would bother me. My face was a sight. I tried different remedies without success and then began using Cuticura Soap and Ointment which completely healed me in two weeks." (Signed) Mrs. E. M. Fawcett, Cundy's Harbor, Maine, March 13, 1922.

Use Cuticura for every-day toilet purposes. Wash with Soap, soothe with Ointment, dust with Talcum. Sample Each Free by Mail. Address: "Cuticura," Dept. 10, P. O. Box 10, Lowell, Mass. Send 10c for Cuticura Soap and Ointment without mail.

Theatrical Treat In Store

All-Star Cast in "Lightnin'" Visits Saskatoon and Regina Next Week

Going directly from their sensational two weeks' engagement in Winnipeg, John Gordon's "Lightnin'" company will play engagements of three days each in Saskatoon and Regina next week. The Saskatoon engagement will open Monday night, April 28, at the Empire Theatre and a matinee is announced for Wednesday. Beginning at the Regina Theatre Thursday night, May 1, the company will remain for three nights and Saturday matinee.

Reports from both cities forecast a cordial welcome for the organization, which is rated as one of the most distinguished that has been sent through Northwestern Canada in many years. Thomas Jefferson, who is playing the title role, which the late Frank Bacon created, is a son of the late Joseph Jefferson, who immortalized "Tip Van Winkle." Miss Bessie Bacon, who appeared in her father's support during "Lightnin'" historic run of three years on Broadway, is also a member of the company, appearing in the role of the yapping ravenlike actress. The company will be sent to London in the early summer.

Separation, But No Alimony

A peaceful, quiet separation, no damage done, everybody happy again—that's the situation when you divorce your cousin. Try Putnam's Cora Extractor. Acts like magic, no pain, no failure, success every time. Refuse a substitute for Putnam's, 25c everywhere.

Good Market For Wool

Could Dispose of Three Times the Amount of Wool Produced in This Country

There is at present a market for three times the amount of wool produced in this country, according to W. W. Thompson, western manager of the Canadian Co-operative Wool Growers, Limited. While in 1922 Canada exported 8,600,000 pounds of wool, valued at \$2,233,931, or over one-half of the total clip, wool imported into the country during the same period amounted to 18,273,314 pounds, valued at \$5,091,598, in addition to wools and wool waste, weighing 9,285,000 pounds and yarn weighing 3,402,000 pounds. Manufactured woolsens of various kinds to the value of a further \$32,000,000 were brought into the country the same year.

Playing Safe

Abey met his friend, Levi, looking very down in the dumps.

"Ed, is the matter, Levi?" he asked.

"Well," said Levi, "business is so bad, I'm afraid I shall have to arrange a burglary."

"A burglary?" said Abey. "Vy not a fire?"

"Ah, no," said Levi, "you see, if you make it a burglary and the insurance company don't pay out, at least you don't lose anything."

No Need Endure the Agony of

Corns with Holloway's Corn Remover at hand to remove them.

Villages Like Movies
People in villages and small towns go to the movies at least as often as inhabitants of England's largest cities, according to figures given in the Kinetograph year book.

Says He Is A New Man

That's Why Nova Scotia Man Praises Dodd's Kidney Pills

Mr. J. J. Comeau who suffered from kidney trouble found relief in Dodd's Kidney Pills.

Lower Saultville, N.S.—(Special)—"Mr. Comeau, a well known and respected resident here is a staunch friend of Dodd's Kidney Pills. He has tried them and found them good. This is what he says:

"I am over 40 years of age, and have suffered so much from kidney troubles. I took several boxes of Dodd's Kidney Pills, and now I am exactly a new man. I shall always remain a friend of Dodd's Kidney Pills."

It is wonderful how some people will go on suffering day after day, with aches and pains, backaches and rheumatism. They suffer because they are not aware of the fact that they can get relief. Strengthen the kidneys, which are the source of the trouble, and these pains vanish.

Dodd's Kidney Pills stimulate and strengthen weak kidneys. They are used and recommended all over the world.

Since 1901, the Nobel prize for contributions to medical science has been awarded to eighteen men of a dozen nationalities: Four to Germans, two to Frenchmen, two to Russians, two to Danes and one each to an American, an Austrian, a Belgian, an Englishman, an Italian, a Spaniard, a Swede and a Swiss.

Insulted French Flag

The French Government has demanded satisfaction from Germany for the recent incident in East Prussia, when enthusiastic members of militarist societies, including a few members of the Reichswehr, slashed a French tri-color to ribbons.

Three Prairie Provinces Now Occupy A Supreme Place In Canadian Dairy Industry

Once more in 1923, the three prairie provinces of Canada, Manitoba, Saskatchewan and Alberta, a territory which five or six years ago was importing butter even into its rural districts, recorded a substantial increase in butter production and further consolidated its position in the dairy industry. Comparing the year 1923 with 1922, the increase in the output in creamery butter in Manitoba amounts to 1.5 per cent, in Saskatchewan to 22.1 per cent, and in Alberta to 15.1 per cent.

The butter production of Manitoba in 1923 amounted to 10,730,150 pounds as compared with 10,529,501 pounds in 1922 and 8,541,095 in 1921. That of Saskatchewan in 1923 was 10,867,010 pounds, compared with 8,901,141 pounds in 1922 and 7,060,698 in 1921. Alberta's production rose from 12,229,264 pounds in 1921 to 15,417,670 pounds in 1922 and 17,750,600 in 1923.

Production in the three provinces taken together in the past three years is as follows: 1921, 25,560,421; 1922, 31,667,815; 1923, 29,247,160 pounds. The rapid ascendancy of the prairie territory to a supreme place in the Canadian dairy industry has been one of the most marked phases of the Dominion's agriculture in the past decade. It is the result of the most serious attention paid to the industry, the adoption of modern methods and the pursuit of most zealous care. It is the result of more profitable diversified farming. In its wake have come splendid dairy cattle, which the west has slowly developed and then which there are none superior in Canada.

The remarkable progress which has been made in dairy production in the past decade, in a comparison with past years. Going back to the beginning of the past decade, the production in the three prairie provinces in 1910 was 1,161,517 pounds, or insufficient for domestic consumption. In 1923 the same territory produced nearly 10,000,000, or practically ten times as much. Alberta increased its production from 192,370 to 17,750,600 pounds; Saskatchewan from 3,292,755 pounds to 10,867,010 pounds; and Manitoba from 674,113 pounds to 10,730,150 pounds.

With a production in excess of domestic consumption the high quality of prairie butter, constantly maintained, easily secured entry for it into foreign markets, and large quantities were found their way to the United States and across the Atlantic. In 1923 Manitoba exported 280 carloads of creamery butter containing 3,563,264 pounds, which found its way not only to Eastern Canada but to the United Kingdom, Chicago and New York. Saskatchewan's export of butter in 1923 amounted to 7,178,574 pounds, or 66.1 per cent of the total production. Of this only 26 cars went west, the remainder of 285 cars going to Eastern Canada, the United States and British markets.

Gratifying reports concerning the quality of Saskatchewan butter and its suitability for the best British trade were received from a number of British dealers. During the year the province of Alberta shipped its first butter to the United Kingdom via the Panama Canal, and this was effected with entire satisfaction, according to the report of the Canadian Trade Commissioner. Four thousand boxes were forwarded in this manner, received in excellent condition, and found a profitable market.

Dairying is perhaps the most significant phase of Western Canadian farming at the present time, heralding a new era in the agriculture of the prairies. The number of dairies in Alberta is now 75, having increased to this number from 51 in 1922. In Saskatchewan there are 65 dairies and an approximately equal number in Manitoba. They have changed the face of the western landscape, interspersing pastures of dairy cattle with fields of wheat and oats, and adding in a substantial manner to the improvement of Western Canadian agriculture.

The more a woman knows the easier it is for her to hold her tongue.

A man seldom exhibits his temper until after he loses it.

Rheumatism.

Minard's penetrates to the root of the trouble and cures pain. The universal remedy.

Briquetting Plant

Fate of Plant at Blenfiat to be Decided Very Soon

The fate of the lignite briquetting plant at Blenfiat, Sask., in which \$1,000,000 has been spent by the Federal Government and the Provincial Governments of Manitoba and Alberta, is to be decided within the next few weeks.

During its visit in Ottawa, Hon. J. G. Gardiner, minister of highways in the Saskatchewan government, had a conference with Hon. Charles Stewart, minister of interior, with a view to discussing the future of this investment. It was announced after the conference that nothing had been decided, but that a policy would be announced in the immediate future. Manitoba was concerned in the proposition to the extent of \$250,000 during 1922. However, the Manitoba Government withdrew from the scheme on grounds of economy, and since that time the research work has been carried to successful conclusion by the other two governments.

Final work, however, was not done at the Blenfiat plant, but at Hebron, N.D., where the United States authorities have set up a research plant for similar purposes. The Canadian authorities shipped to Hebron a quantity of Saskatchewan lignite, which was crushed and briquetted successfully. The product was shipped back, each government receiving a share, and subsequently tests proved that the briquet was a first-rate fuel. The difficulty, however, is that the cost of briquetting is so great as to make the discovery of very little commercial value.

Many German Settlers.

Steady Increase Is Shown in Arrivals From Germany

Steady increase in the immigration of Germans to Canada is shown in a return table in the house. In 1923, 1,258 Germans came to Canada, of whom 794 were agriculturalists. It is also shown that for the first two months of 1924 some 521 Germans settled in Canada, of whom 219 were agriculturalists.

Canada's immigration agencies in Great Britain employ 125 people at a total annual payroll of \$125,772, according to figures given in the house. In Continental Europe there are 28 immigration agents, whose payroll is \$18,619, and in the United States there are 51 at an annual cost of \$90,171.

ASPIRIN

Beware of Imitations!

Unless you see the "Bayer Cross" on package or tablet you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-three years for Colds, Headache, Lumbago, Neuritis, Rheumatism, Neuralgia, Pain, Pain. Accept "Bayer Tablets of Aspirin" only. Each unopened package contains proven directions. Handy boxes of twelve tablets of Bayer Aspirin. Druggists also sell bottles of 24 and 100. Aspirin is the trade mark (registered in Canada) of Bayer Manufacturing of Monroeville, Pa., U.S.A. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Automobile Production
Automobile production in Canada during 1922 was valued at \$81,956,420, which is a considerable increase over the previous year, when the output was valued at \$61,466,273, according to a report issued by the Federal Bureau of Statistics. A large and increasing part of this volume of business is for export. In 1922, \$24,080,191 worth of automobiles and trucks were shipped abroad to practically every civilized country on the globe.

It has been figured out that a garden plot, approximately 40 feet square, will furnish ample exercise for one family, three cats, an Alsatian, and 21 strange chickens.

Natural Resources Bulletin

Immense Amount of Lumber Used for Commercial Purposes

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa, says:

Lumber, and pulpwood have for years been looked upon as the chief products of our forests, with the result that little attention has been given to the smaller and yet very essential products. Canada's forested areas are represented in so many miles of use that it would be useless to try to enumerate them, but a few outstanding ones may be mentioned.

British Columbia estimates that this year 6,000,000 fruit boxes will be required to provide for the province's apple crop.

Nova Scotia uses over 1,500,000 barrels each year to ship apples, the barrels averaging about 15 staves each. One Nova Scotia plant has been given a contract for 10,000,000 staves.

It requires 12,000,000 new logs each year to supply the Canadian railways for up-to-date use.

Telephone and telegraph companies use one million poles each year.

The coal mines of Nova Scotia use one million tonnes, or 20,000,000 lined feet of timber, each year for mine props.

There were over 12,000,000 boxes and packing cases made in 1920, also nearly 3,000,000 cheese and butter boxes.

"The forests, after supplying all this material, will continue to do so from normal growth, provided they are protected from fire. Forest fires are destroyed more timber annually than is used for commercial purposes. Save the forest and save the wood-using industries."

Hatching With the Incubator

Intelligent Handling Is Needed to Secure Best Results

When using an incubator for the first time, one is fortunate if a high percentage hatch is secured, as experience is needed to be able to follow every clear direction in work of this sort. Exhibition Circular no. 2 of the Experimental Farms, recommends a well ventilated, cellar with a fairly even temperature as a good location for the machine. In any case, fresh air is necessary, but draughts should be avoided. It is also important if it has not a suitable cellar, that the machine should stand on a floor that does not vibrate when walked upon. To get satisfactory results it is necessary to have the conditions right in relation to heat, moisture, cooling, turning and testing. The circular to which reference is made, "Artificial Incubation," and obtainable from the Publications Branch, deals with these points and shows by illustrations and contrast pictures, suitable and unsuitable types of eggs for hatching. An essential point brought out is that the eggs for hatching should be secured from vigorous well-bred stock. With such eggs a modern incubator should be depended upon, if properly handled, to yield a good proportion of chicks from the eggs entrusted to it.

Alberta Telephones

Provincial Government Telephone System Has Wide Ramifications

A total of 969 communities in Alberta are now served by the Provincial Government telephone system. In addition, connections have been made with 455 offices in the province of Saskatchewan, 289 offices in Manitoba, 78 in the Western States, and 53 in British Columbia. The total number of phones served by the system is now 67,279, of which 32,240 are exchange phones, 29,252 are rural phones and 1,885 are private party lines, and 1,338 are connecting subscribers. There are 261 exchanges in the province, with 201 toll offices and 62 private party lines.

Prairie Fisheries

Total Value of Catch for 1923 Given As \$1,745,975

The total value of the commercial catch of fisheries of the prairie provinces for 1923 was \$1,745,975, comprising \$1,020,585 for Manitoba; \$286,643 for Saskatchewan; and \$438,737 for Alberta.

All of the provinces show increased value of production, the total increased over the previous year amounting to \$260,583, or 17 per cent. The total value of production, which fish contributes 43 per cent; pickerel, 29 per cent; pike, 7 per cent; and ulibee, 5 per cent.

The fisheries of the Yukon Territory in 1923 had a value of \$119,171, an increase over the previous year.

The name "poko" of orange pekoe tea is derived from the Chinese words "Pah ho," which mean "white hairs," and refers to the small white places in this tea which look like stems, but are the finest parts of the leaf.

Macmillan Party Safe

DONALD B. MACMILLAN

whose party, incumbent in the Bowditch north of Greenland, is still safe, according to a radio message which has been picked up.

Labor and Education

Giving Children of the Rich and Poor An Equal Chance

Mr. Trevelyan, minister of education in the MacDonald Government, in an article in the Labor Magazine, declares that his first object has been to bring to an end the campaign of economy in educational expenditures based upon the recommendations of the Geddes committee. He refers to these as "harsh and soulless economies." Mr. Trevelyan has no sympathy with the suggestion that there is too much advanced education for young people not fitted to receive it. Mr. Trevelyan says:

"We have before our minds as our objective advanced education for all people. We refuse to think only about the clever boys and girls. Who, indeed, can tell which the clever ones are at twelve years old?"

"All normal children of the working and lower middle classes ought to have precisely the same chance of full education as the normal child of the wealthy has today. We don't ask whether the son of a country gentleman is clever before we give him the chance of being educated in a public school, nor ought that question to be asked of other children."

CORNS

Lift Off—No Pain!

Doesn't hurt one bit! Drop a little "Freezone" on an aching corn. Instantly that corn stops hurting, then shortly you lift it right off with fingers.

You'll suggest salts a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn or corn between the toes, and the foot cures, without soreness or irritation.

Fur Market at Edmonton

More than \$2,000,000 worth of raw furs are received in Edmonton annually, and a fur exchange will be established at Edmonton. It is expected that this institution will give a useful impetus to this important Alberta industry.

A bell dating back to the time of St. Patrick has been found in the ruins of Nendrum Abbey in Ulster, Ireland.

The home of the chestnut is in the Mediterranean region, where chestnut trees have been cultivated from early times.

Liver and Bowels Right—Always Feel Fine

There's one right way to speedily tone up the liver and keep the bowels regular. Carter's Little Liver Pills never fail. Millions will testify that there is nothing so good for biliousness, indigestion, headache, nervousness, pimples, skin. Purely vegetable. Small Pill—Small Dose—Small Price.

Solving The Problems Of Intending Settlers In Canada Who Have But Little Capital

The problem of the intending farmer who arrives in Canada with little or no capital is occupying the land settlement branch of the department of immigration just now. A statement issued by Hon. J. A. Robb says that recent surveys of the situation in Canada have disclosed that in many communities there are farms equipped with habitable buildings which can be had on very nominal first payments or without any cash deposit at all.

In many cases there are settlers in the same district who are willing to lend machinery to newcomers in exchange for manual labor. By taking advantage of these circumstances it is believed that the road will be opened to a considerable number of British and European settlers with a knowledge of agriculture who find themselves with little capital at this time.

The land settlement branch of the immigration department was recently organized to direct new settlers to lands where they have the best chance of success, to safeguard them from exploitation in the purchase of lands, and to facilitate the placing of immigrants of both sexes in farm employment.

The statement of the minister of immigration says that the interest of the land settlement branch will be to facilitate the settlement of settlers who are factually located, but the branch will continue to exercise friendly assistance as long as it is needed. It is particularly emphasized that the scope of the branch extends to all Canada, not merely to Western Canada.

One peculiar problem confronting the land settlement branch is the disposition of settlers so that they may have the benefit of community life with people of their own tongue and race and yet to diffuse European settlers in such a way as to secure their absorption into Canadian life and their understanding of the Canadian point of view.

The branch is listing lands available for sale and advisory settlement boards are being formed in many districts to pass on the suitability of the lands and assist the department in fixing a fair price for the lands. These boards also will promote community welfare work, trying to prevent the oversettling of any particular district and to provide a helpful medium for settlers.

"Through the branch a field staff special impetus will be given to community welfare organization," says Mr. Robb's statement, "and every endeavor will be made to extend to the new land settlers not only a friendly welcome, but practical guidance in initial operations to overcome the inevitable difficulties awaiting the newcomer. This guidance and direction will be continued so long as it is found necessary. It is to be a real service organization, permeated with a desire to assist the incoming settler and to make him, as speedily as possible, into a prosperous Canadian citizen. Permanence of settlement of the immigrant is the keynote of the policy."

The land settlement branch recently formed will be a new factor in the solution of farm employment problems. The branch will make a survey of farm labor requirements and seek to meet these by placing immigrants as well as directing the settlement of immigrants who wish to take up their own farms on arrival.

Field officers of the land settlement branch will seek to place to the best advantage all immigrant laborers, and an immediate result of initial surveys by the branch is that it has more applications from Canadian farmers for labor than it is able to present to supply.

The branch will see particularly to placing advantageously those who come to Canada under the nominated passage scheme. A considerable movement of Britishers to Canadian farms is anticipated within the next six weeks. There is also in evidence a considerable immigration from the Irish Free State, which will share in the reduced rates arranged for them from Great Britain and Ireland to Canada. The Irish Free State, however, being a separate country within the British Empire and not affiliated with the British Government in the financial arrangements for carrying on the British-Canadian nominated passage scheme, does not come within the provision of the nominated passage.

Honey Production In Alberta

Lethbridge Experimental Farm Meets With Success In Keeping Bees

From tons of honey, according to W. H. Fairfield, of the Lethbridge experimental farm, were produced last season by the honey-bees of the Lethbridge district. "On the experimental farm," said Mr. Fairfield, "we averaged 200 pounds a week from our bees."

Mr. Fairfield is a well-known authority on apiculture and bees. He has imported bees from the States in parcels and has had very good results from all his extensive workings with the bee industry. Mr. Fairfield feels confident that in a few years the province of Alberta will be exporting honey to the eastern provinces. Everything is in favor of the Alberta producer," says Mr. Fairfield, "when they do start in the bee industry."

Last summer at the experimental farm they had produced from all the colonies an average of 200 pounds of honey a week, which retailed at 29 cents a pound. The best hives yielded 400 pounds of extracted honey. These bees worked like factory hands, starting after seven o'clock. They were working, hive, bees, honey and all, each morning at seven before the starting whistle blew. Thus an accurate account of their work could be made in the experimental farm records. It was found that some of these hives gained as much as 22 pounds in one day when the bees were busy in the nearby fields of alfalfa bloom. All told, about four tons of honey were produced in the Lethbridge district last year.

Supplanting Jap Goods

British and Germans Are Making Inroads in China

British and German goods are supplanting the products of Japanese industry in the Chinese market.

The Germans excelled the Japanese in cheap lines, while the British do so in goods of superior quality. In cotton yarns, for instance, Chinese goods can well equal the Japanese in big size stuff, while in fine twines the British are supreme.

Chinese are able to produce at much less cost than Japanese. Labor in China is very cheap. The average wage rate for a full-grown male laborer is 30 sen, for a female 25 sen, and a child draws 15 sen. In spite of such ludicrously low remuneration, they can develop at least 60 per cent of the efficiency of Japanese labor.

China's disadvantage lies in the high rate of interest, which is due to the scarcity of available capital, which makes speculation in some raw materials out of the question.

Japan is much concerned over the possibilities of the Chinese market. In spite of her political troubles, Chinese business and industry continue to expand. With political conditions in order there will be even greater development.

Stung!
In Algebra class—"What does 'b' plus 'b' plus 'b' equal?"

Cover Your Shingles with A

Stephens' PRODUCT

For new shingles—**Stephens' Shingle STAIN**

For old shingles—**Stephens' Shingle PAINT**

On new shingles you want *Shingle Stain*.

But when shingles get weathered, they thicken up, become porous and absorbent—like blotting paper. That's when you want *Shingle Paint*—a new Stephens' product, remarkably successful, and exclusive to Stephens' manufacture.

Shingle Paint gives strong, brilliant, permanent color effects. It is particularly useful on new and old roofs alike, where color dominance counts.

An old black roof can be made Red, Green, or any color with *Shingle Paint*. This cannot be accomplished with a stain.

Eminent Railway Builders

A unique record of Canadian railway pioneer engineers is embodied in the photograph taken in Vancouver recently of three prominent members of the profession whose record for the construction of railways is possibly without parallel. They are—standing from left to right, H. J. Cambie, M.E.I.C., eighty-seven years of age; T. H. White, M.E.I.C., seventy-six years of age; and J. H. Kennedy, M.E.I.C., seventy-two years of age. They are all resident in Vancouver. Each has been identified with one of the three great transcontinental railroads now operating in British Columbia, as chief engineer on the location and construction of the original main lines within the Province, pioneered through the wilderness of mountains, canyons, forests and plains by feats of engineering skill and perseverance not surpassed and scarcely equalled in any other part of the world. Each one is enjoying excellent health, and occupies the very highest place in the respect and esteem of the members of the engineering profession together with the general public. Another very interesting coincidence, lies in the fact that each one possesses the apparently magic name "Henry".

Henry John Cambie, M.E.I.C., was born on October 25th, 1836, in County Tipperary, Ireland. He had charge of the location of the present main line of the Canadian Pacific Railway from the Coast to Griffin Lake, and was chief engineer of the now-famous construction through Fraser Canyon from Yale to Lytton, and also the construction of the section from Savona Ferry to Shuswap Lake.

Mr. Cambie has been continuously associated with the Canadian Pacific Railway and its predecessor, the Government Railway, for sixty-eight years. His name is perpetuated by the station on the Canadian Pacific, Cambie, on the giant loop below Glacier. Mr. Cambie explored, surveyed and planned the whole course of the Canadian Pacific through a large section of the province of British Columbia, and under his direct supervision the part that runs through the canyons of the Fraser was built. At the age of eighty-seven he is still hale and hearty, enjoying the love and esteem of his fellow men.

Thomas Henry White, M.E.I.C., was born on January 27th, 1848, at St. Thomas, Ontario. He was chief engineer of the location and construction of the present main line from the Yellowhead Pass, down the North Thompson and Fraser Canyons to New Westminster. It is interesting to note that he was Mr. Cambie's right-hand assistant during the work in the Fraser Canyon.

Mr. White has always been popular with his fellow engineers, being noted for abundant good nature, keen sense of humor, and an absolute fairness in all his associations.

FORMER IRMA RESIDENT PASSES AWAY AT EDMONTON

The funeral of the late Orrie Allison Edland took place Monday afternoon at 2 o'clock from Andrews Brothers' parlors to the soldier's plot in the Edmonton cemetery. Rev. Lorne McTavish officiated. Mr. Edland is survived by his widow, 10223 103rd street; his father and mother, four sisters and one brother of Turlock Cal. Beautiful floral tributes were received from the following: His wife, the Weir family, Billy, Kate and Mary, Revillon Wholesale Ltd., employees Revillon Wholesale Ltd., the Elong family, Irma; Mr. and Mrs. Beamont; Mrs. Turnbull, Ronald and Janet; the Kelly family; Mr. and Mrs. D. C. Robertson; L. O. O. F., No. 56, Irma; Mr. and Mrs. John Alexander, Mr. and Mrs. J. MacDonald, and others.

Here and There

The annual statement of the Canadian Pacific Railway and the report which the company's president, Mr. W. B. Beatty, made to the shareholders at the annual meeting on May 24th, that the operations of the company had been conducted throughout 1924 in a satisfactory manner and with satisfactory results. Mr. Beatty pointed out that gross earnings for the year, which had totalled \$135,867,080, were greater by \$1,020,000 than those of 1923. Working expenses, however, increased by \$7,084,000 to \$153,353,079. This large increase in operating costs was due to large expenditures made upon the property in order that it might keep to the highest possible physical standard and capable of rendering the best service to the country.

As a result the property was never in so excellent a condition as it now is. Net earnings for the year were \$37,479,010, an increase of \$1,177,000. The total tonnage moved by the company during the year amounted to 30,852,994, an increase over that of the previous year of 3,108,408, due to a heavier movement of grain, lumber, manufactured articles and general merchandise. The largest increase being in grain and grain products. Mr. Beatty pointed out that this satisfactory condition had extended well into the present year and that due to favorable operating conditions and heavy traffic net earnings for the first quarter of 1924 had increased over those of the same period last year by \$1,253,314. Referring to the Government system of railways, Mr. Beatty said that the difference between it and the Canadian Pacific was largely in name only and in the accident of personnel or shareholders. The securities of both systems were owned by private investors throughout the world and there was a significant increase in both Canadian and British holdings of Canadian Pacific common stock. Two phases the general railway situation called for criticism. Under a statute passed in 1919 the Government-owned lines may construct branches without approval as to location and other details by the Railway Commission. The Government may parallel or duplicate existing lines of any other company once the Minister approves the expenditure. Mr. Beatty stated that in his opinion it was equally in the interests of the Canadian people and of all Canadian railroads that the companies should be in the same position in this respect. The other phase was the result of the Crow's Nest Pass agreement of 1907. It had established special statutory freight rates under conditions of operating costs which no longer exist and differences in rates which would not be permitted under the general Railway Act because of their unfairness in relation to common-law rates on other articles and to the rates effective in other parts of Canada. The greatest advantage to shippers as a whole would be secured if all rates were made subject to review and change as conditions warrant by the tribunal constituted for that purpose.

In referring to the outlook for the future, Mr. Beatty said that while there was a noticeable fall in domestic and export shipments due to the depression in industrial districts, general business during the first quarter of the year had been satisfactory. The crop acreage would probably be about the same as last year, and generally speaking soil conditions were excellent. "If the total yield approaches that of 1923," said Mr. Beatty, "there will undoubtedly be a very extensive autumn business and a vastly improved psychological and financial situation throughout the whole country. There is no real ground for pessimism in respect of the future of either the country or the country, though an extraordinary and too rapid advance is neither to be expected nor desired."

SIXTH
of the series dealing with the establishment of the
BANK OF MONTREAL at representative points in CANADA
and elsewhere

THE growth of the Bank of Montreal has closely coincided with the gradual development of Canada from a small colony to a great Dominion.

In the Bank's westward advance to the Pacific Coast, one of the important links in its transcontinental chain of Branches was formed in 1878 at Winnipeg, when the Bank opened its first Branch west of the Great Lakes.

This forward step, taken seven years before railway communication was opened up between Montreal and Winnipeg, made available to the incoming population on the prairies the stabilizing co-operation of a strong, conservative and at the same time energetic financial institution.

Of the Bank's 567 Branches, 12 are situated in Winnipeg and 180 in the Prairie Provinces, including Winnipeg.

WARMTH AND VENTILATION.

Most persons feel dull, sleepy and generally uncomfortable in crowded, ill-ventilated rooms. It was believed until comparatively recently that its ill feeling was due to some change in the chemical make-up of the air. Scientists say they know now that the physical properties of the air—its temperature, humidity and movement—are of most importance.

One of the biggest problems in the ventilation of houses, schools and other buildings is the avoidance of overheating, which in reality is more injurious than moderate coolness in a room, except in the case of the very

young, the very old, or invalids. Man has a number of mechanisms in his body which regulate his temperature.

In addition, he successfully provides against too much loss of body heat by warm clothes and by artificially heating the air in his living apartments. The problem of ventilation is to surround the body with air of sufficient warmth, humidity and motion to sustain the body of its normal temperature without calling on the automatic devices in the body to increase or decrease the elimination of heat. When all has been said and done about ventilation, practical science concludes that there is nothing better

or healthier than keeping the windows open, which permits of the best range of variability.

Opening windows on opposite sides of a room will cause a draught, and one is liable to take a cold. A good way to ventilate is by raising the lower sashes and lowering the upper sashes of windows on one side of a room or building.

The poet's description of wrinkles as "lines creased by pain and sorrow," might be more correctly expressed "lines creased by the wrong position in sleep." The number ways that the hand under the cheek during sleep can make wrinkles in the face is amazing.

For instance, it will flatten out the flesh, and force the eye upward, and the corner of the mouth downward. It will distort the whole side of the face, and is equivalent to a nightly massage in the wrong direction, which in time will change the whole expression of the face.

There are also wrinkles of the body that come during sleep. Curling up in bed like the letter "C" will cause stooped shoulders, and a huge pillow is ruinous to the health. A noted doctor has said that the best position during sleep is to lie on the right side, with the limbs comparatively straight, and the head upon a low pillow.

Always have Mustard on the table

It's not just custom that makes people take mustard with their meals. Mustard aids digestion and helps to assimilate the meals. It is a good habit to acquire. Mix it freshly for every meal.

but it must be Keen's

Plenty Of Newspaper

The Supply is Assured, But the Prices Do Not Weaken

"There is absolutely nothing in the newspaper situation, either in Canada or in the United States, to support the pessimistic statements originating in certain quarters and widely circulated through the press to the effect that a break in the newspaper market is imminent," said Edward Beck, secretary of the Canadian Pulp and Paper Association, speaking at Montreal. "The industry is in a perfectly healthy condition," Mr. Beck added, "and while Canadian production for the first quarter of the year shows an increase as compared with the corresponding period of last year, shipments have kept pace with increased production."

Mr. Beck concluded: "No Canadian manufacturer of newspaper, as far as I am aware, has reduced his contract price or is contemplating doing so, nor is there any reason to anticipate such a development in the near or remote future."

Pain In the Muscles, Stiffness In Joints, Quickly Subdued By Nerviline

Those who have tested out numerous liniments will agree that where stiffness is needed, Mr. Nerviline, a deep-seated, more or less chronic condition, there is nothing to compare with Nerviline. It's because Nerviline penetrates so deeply, because it has about five times the strength of the ordinary oil preparation, it has come to be known as "Nerviline Pain." For Rheumatic conditions, muscular and joint stiffness, Nerviline works wonders. Get a 50 cent bottle from your dealer today.

Why Men Get Bald

She—"Is my hat on straight, Henry?"
Henry—"Quite straight, my dear. Now, do hurry—we're late already."
She—"Well, I shall have to go back, then—this isn't the sort of hat that is worth straight."

LOWERED VITALITY

A Condition Following Indoor Confinement Of Winter

There are very few people who do not need a tonic at this season of the year. The reason for this is that whether in the home, the office or the factory, people have been sitting throughout the long winter months in an atmosphere more or less vitiated, and as a result, their vitality has been lowered. The long months of winter your blood has been growing thin and poor. Closer confinement and lack of exercise have used it up and exhausted it. You are not as energetic as you could wish. Your work life is not so bright. Your nerves may be shaky and your appetite poor. All these things point to poverty of the blood. It is a scientific fact that if the blood of the strongest is tested in the spring there is less of it and it is poorer than it was in September. The spring medicines of our grandmothers—sulphur and molasses, salts and the like—contained the necessary aid at this season, but were an unsatisfactory attempt to cleanse the blood. Modern medical science has found a better way. Dr. Williams' Pink Pills make new, rich blood at the first dose and at every dose afterwards. They strengthen every organ of the body and give new vitality to the faded system. Here is proof. Miss Clara Cheslock, High Falls, Que., says: "I was in a much run-down condition and my blood was thin and poor. I took Dr. Williams' Pink Pills, and I must thank you for the good they did me. I never enjoyed better health than I have since I took them. You can get these pills through any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont."

Remarkable Power Project

Italy to Provide Electricity For Island of Sicily

The island of Sicily is to be provided with electric power from Italy, which will embrace the direction of one of the highest and most wonderful transmission wires in the world. It has been received from the American Bridge Company for the construction of two steel towers, higher than the famous Eiffel Tower in Paris, which will carry the trans mission cables across the Straits of Messina. The height of the towers will be approximately 1,082 feet, and the distance between them will be two miles. There will be two circuits of three cables each, running thirty feet apart. The cables will be of steel, about four-fifths of an inch in diameter, and will clear the water in the centre of the straits at a minimum height of one hundred and thirty feet. At one terminus the cables will have automatic movable attachments to allow for changes in temperature and for wind pressure.

Concrete Railway Ties

Will Resist Wear As Well As Wooden Ones

Concrete railway ties, used on a section of a right-of-way in Northwestern India, have proved to resist wear and weather equally as well as wooden ones, according to a report. It is believed their employment will result in great savings of lumber and labor, since they will not require re-laying as frequently as the timber. The concrete beam consists of two blocks tied together with steel straps. The rails are fastened on by means of spikes driven into treated-wood plugs set in the concrete. — Popular Mechanics.

How Many Pounds Would You Like to Gain in a Week?

If you are thin and want to gain weight, weak and want to be strong, I will send you a sample of famous Alkermes, absolutely free. No money, just name and address to: ALEXANDER'S LABORATORIES, 334-Bathurst Building, Toronto, Canada.

Pulp and Paper Exports

February Exports of Pulpwood Amounted to 131,785 Cords

According to a report recently issued by the Canadian Pulp and Paper Company, the exports of pulp and paper from Canada in February were valued at \$10,947,199, an increase of \$17,149 over January. It exceeds the total for February, 1923, by \$963,531. February exports of pulpwood amounted to 131,785 cords, valued at \$121,525, which is the highest figure recorded since August, 1923, and compares with 99,320 cords, valued at \$868,128, exported in February, 1923. Total exports for the two months to February 29th, are valued at \$21,847,219, as compared with \$20,281,121 in the same two months of 1922.

Marble Bust of Laurier

The sculptor, Andre Vermaire has handed to Philippe Roy, Canadian commissioner-general in Paris, a marble bust of the late Sir Wilfrid Laurier, which was ordered by the government of Quebec, and also a model of the future basilica at Ste. Anne du Beauséjour.

Miller's Worm Powders destroy worms without any inconvenience to the child, and so effectively that they pass from the body unperceived. They thoroughly cleanse the stomach and bowels and leave them in a condition not favorable to worms, and there will be no revival of the pests.

A liquid which if applied to a "run" in silk hose prevents further unraveling until the fabric can be mended has been discovered.

It's a funny civilization that kills off all the birds and then wonders bitterly why Providence afflicts it with insects.

Diamond Dyes

Don't wonder whether you can dye or tint successfully, because perfect home dyeing is guaranteed with "Diamond Dyes" even if you have never dyed before. Druggists have all colors. Directions in each package.

Another Use For X-Rays

Will Expose False Representations of Famous Paintings

Fraudulent representations of paintings by the masters can be detected by turning ultra-violet light rays on the art objects, according to members of the faculty of the art department in the University of California. Experiments along this line are being made at the university.

Under ultra-violet rays the brush strokes show plainly," said a professor, "and if photographs are made while the lights are turned on the canvasses, the kinds of color used are also shown, and when these are compared with the kinds known to have been used by the artist supposed to have painted the picture, any fraud can be detected. The Germans have used the same system in criminology for a number of years, and this is simply applying the process to painting. It is inevitable that it will come into general use."

Asthma Cannot Last when the greatest of all asthma specific is used.

Dr. J. D. Kellogg's Asthma Remedy deserves this exalted title. It has to its credit thousands of cases which other preparations have failed to benefit. It brings help to even the most severe cases and brings the patient to a condition of blessed relief. Surely suffering from asthma is needless when a remedy like this is so easily secured.

Trick and Artifice

A French chemist is making a wood more firm and beautiful than oak or mahogany by mixing certain sawdusts, chalk and cheap chemicals together and subjecting them to high pressure. The product can be made to take a high polish and is virtually fireproof. We get sawdust in making lumber and then we make lumber from sawdust, but how long can this thing keep up? There must be a catch in it somewhere.—Los Angeles Times.

Northern Lights Mostly Nitrogen

Protracted researches into the nature of the Aurora Borealis known as the "Northern Lights," led Professor Vogard of Christiania University to believe that its essential character is nitrogen, and that the green line which is the chief feature of it consists of small particles of frozen nitrogen in the highest part of the atmosphere. This line appears when frozen nitrogen is exposed to electric rays.

You never can tell. The fellow who goes out of his way to put you onto a good thing will generally, bear watching.

Sugar cane was first cultivated in the United States about the year 1751.

This way clever women resist the years

The simplest beauty secret known—but the most effective

Every day you see women well along in years, who still retain the charm of youthful, lovely skin. They are not unusually fortunate—just clever enough to resist the years!

They know and follow a simple method, which you may employ as successfully as they do. This tells you how:

Authorities advise this
Cleanse the skin regularly, and

Swine Breeders
More than one hundred swine breeders have taken advantage of a special educational short course in bacon and hog production conducted by the University of Saskatchewan recently. Lectures and practical demonstrations on different phases of the industry were given. Judging competitions in which hogs were judged before and after being slaughtered was one of the features.

A Severe Attack Of Heart Trouble Was Relieved By MILBURN'S Heart and Nerve Pills

Mr. S. E. Barnes, Athens, Ont., writes:—"Four years ago I had a very severe attack of heart trouble. I consulted my doctor; he treated me for some time, but I only seemed to be getting worse. I finally went to my druggist and purchased three boxes of Milburn's Heart and Nerve Pills and derived immediate relief from their use, and I can truthfully say they are a wonderful medicine. I always keep a box on hand, and if I feel out of sorts I take a few pills and feel all right again."

Length of "Don Quixote"
One of the earliest of still popular novels, "Don Quixote," is also one of the longest; it is estimated to contain 161,000 words. Begun in prison, the first part was published in 1605, and the second ten years later.

Each person in the U.S. would have \$164 if the total deposits in the savings departments of banks and trust companies were divided equally among the entire population.

MRS. HARVEY DISHMAN

Little Unemployment in Alberta
Due to demand for spring labor, there has been a considerable decrease in unemployment in Alberta; the number of unemployed at the end of the second week in March being stated to be 481, which is the lowest figure for some years. This means that there is less than one person per thousand of population of the province of Alberta out of work.

Advances to Soldier Settlers
Government advances to soldier settlers for seed grain and relief are revealed in answer to a question in the Ottawa house. They comprise \$1,863,793 for seed, \$100,916 for subsistence, \$666,729 for building, \$143,082 for clearing, and \$14,014 for draining. The board has spent \$29,959 on roads in soldier settlements.

Costs Millions Yearly

Sand Used for Safety of Railways is Expensive

While big figures are used in telling the cost of safety to the railways, the amazing item to the average person is the amount spent for sand. Four tons are required for every mile of road in the United States, according to the figures of one trunk line with 7,500 miles of track. As this road is in the middle west and south, where mountains are not encountered, the figures given are regarded as conservative. The cost of putting the sand into the engine box is placed at \$2.50 a ton as an average minimum. For a 100-ton car, the yearly cost is estimated at \$2,637.07. For the most part the sand is brought from river bottoms and dried by waste steam at the round house.—Popular Mechanics.

Revenge as contemplated may be avied, but it is always more or less bitter when realized.

PILES

Do not suffer another day with itching, bleeding, or protruding piles. Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 50c a box, all dealers, or E. J. Chase & Co., Limited, Toronto. Send for free trial if you mention this paper and enclose 2c stamp to pay postage.
